Program Title: Minor in Exercise Science (21046)

Department Offering Program: Department of Health and Human Performance
College of Health Professions and Human Services

Catalog Description: The Exercise Science minor provides students with substantial insight into the acute and chronic physiological responses to exercise, sport, and physical fitness. Students will apply this knowledge to develop expertise in designing and supervising comprehensive physical fitness programs for the healthy and those with controlled diseases in non-clinical settings. This program will provide opportunities for field experiences and professional certifications. These opportunities will enhance professional qualifications for job opportunities in allied health professions, physical education, business, health education, recreation, and many other disciplines.

Program Objectives

1. Conduct and interpret assessments for all fitness parameters for healthy participants and those with controlled disease.
2. Implement exercise prescriptions critically analyzing theories of training.
3. Appraise health behaviors and apply motivational strategies for health promotion.
4. Create and administrate injury prevention and health promotion programs for corporate, community, and commercial fitness and wellness facilities to reduce member, employee, and business risk.
5. Apply leadership and organizational management skills to promote health behaviors in culturally diverse organizations.

Students with a minor in **Exercise Science** are required to complete 15 credits for the minor. Four core courses (10 credit hours) and three-five additional courses from designated electives (5 credit hours) will be required for completion of the minor program.

The minor requires that students must maintain an overall GPA of 2.0 and a 2.5 GPA in the required courses taken for the minor. No class substitutions will be approved.
